

**Pflichtseminar: Hauptseminar Molekulare Mikrobiologie und Infektionsimmunologie für Studenten der Molekularen Medizin
Wintersemester 2021-22**

19.10.2021 introduction and distribution of topics
26.10.2021 term paper disc#1
02.11.2021 RG-1 adhesion and invasion
09.11.2021 RG-2 bacterial secretion systems
16.11.2021 RG-3 modulation of intracellular trafficking
23.11.2021 term paper disc#2
30.11.2021 DS-1 pathogen recognition
07.12.2021 DS-2 Immune evasion#1
14.12.2021 DS-3 Immune evasion#2
21.12.2021 term paper disc#3
11.01.2022 DV-1 innate lymphoid cells
18.01.2022 DV-2 function of T helper cells
25.01.2022 DV-3 immunity against helminths
01.02.2022 term paper disc#4
08.02.2022 feedback
